

ROI for Emotional Intelligence in Business

Managers account for a whopping 70% of employee engagement variance according to Gallup.

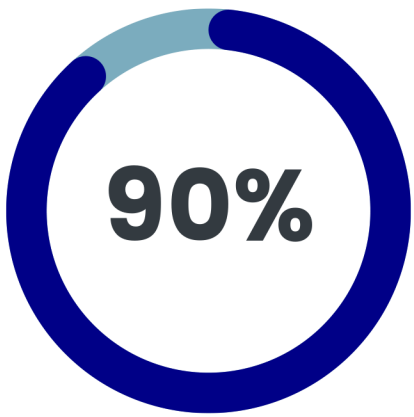

Varying engagement levels directly impact productivity, profitability, turn-over rates and much more.

"The science is clear – emotional intelligence results in serious ROI."

Heather Haygood, Founder
HMH Solutions

Emotional Intelligence accounts for 90% of the difference between average and outstanding managers – and those outstanding managers are the game changers for engagement.

When comparing employee engagement levels, Gallup found that top-and bottom-quartile business units and teams had the following differences in business outcomes:

Organizations with high engagement earn 3.9 times more per share.
